

MIN ZHANG

E: m.zhang42289@gmail.com

T: +44 07887890370

I am currently a PhD student at University of Warwick where I am researching on scalable node ranking, link analysis, graph mining, and information retrieval.

Education

The University of Warwick **2023.10-2027.10(expected)**
PhD Computer Science Fully-funded by Department of CS **Coventry, UK**
Research Topic: Large-Scale Graph Mining, Searching and Ranking, Information Retrieval.

Imperial College London **2020.09-2021.11**
MSc Financial Technology **MSc with Distinction** **London, UK**
Relevant modules: Machine Learning for Economics and Finance, Text Mining for Economics and Finance, Big Data in Finance 1, Blockchain and Applications, Financial Econometrics in R/Python, etc.
Dissertation: Stock Prediction based on Financial News using Text Mining Technique

The University of Liverpool **2018.09-2020.06**
BSc (Hons) Computer Science **First-Class Honours Degree** **Liverpool, UK**
Relevant modules: Introduction to Data Science, Advanced Artificial Intelligence, Computer Vision, Knowledge Represent & Reason, Introduction to Computational Game Theory, Database Development, etc.
Dissertation: "Touching to See" using Generative Adversarial Networks (GANs)

Xi'an Jiaotong-Liverpool University **2016.09-2018.06**
BSc (Hons) Information and Computing Science **Suzhou, China**
Relevant modules: Linear Algebra, Multivariable Calculus, Introduction to Programming in Java, Computer System, Algorithmic Foundations and Problem Solving, Data Structures, Physics II: Introduction to Electromagnetism, etc.

Publication

[SIGIR'25] Min Zhang and Weiren Yu. 2025. UPPR+: Scaling Uncertain Personalised PageRank Computation on Billion-Sized Graphs with Mutually Exclusive Edges. In Proceedings of the 48th International ACM SIGIR Conference on Research and Development in Information Retrieval (SIGIR '25), July 13–18, 2025, Padua, Italy. ACM, New York, NY, USA, 10 pages. <https://doi.org/10.1145/3726302.3730113>

M. Zhang. Analysis and Design of customer relationship management system for rural commercial bank based on artificial technology. Modern Information Technology, vol.6, no.104(14), pp.97-102+109, 2022

Research Experience

The Alan Turing Institute (Data Study Groups, researcher) **2026.01-2026.02**
Modelling AI competency needs in the UK labour market

- Analyzed UK labor market to identify AI-related skills, employment distribution, and supply-demand mismatches.
- Selected nowcasting economic indicators and extracted AI skills from Skills England, Bridge AI framework.
- Predicted labor market using mixed-frequency forecasting models based on Lightcast job posting and GVA data.

Imperial College London (Applied Project) **Selected as a Sample AP dissertation** **2021.04-2021.08**
Stock Prediction based on Financial News using Text Mining Technique

- Pre-processed the financial news, share prices, size, P/E ratio, dividend yield and volume of Pfizer Inc.
- Text mining for financial news using Word2Vec and GloVe approach. Train and predict the sentiment analysis
- Predicted stock prices using these feature data with neural network, random forest, SVM models.

The University of Liverpool (Final Year Project) **2019.09-2020.05**
"Touching to See" using Generative Adversarial Networks (GANs)

- Collected 1000 visual and 1000 tactile images using GelSight sensor and Canon camera
- Built GANs to model tactile images and generate the corresponding visual images, vice versa
- Gained the above 65% similarity between two types of images and the final score of this project is first-class

Work Experience

The University of Warwick (Teaching Assistant, part-time) **2024.01-Now**

- Taught a lot of modules, such as Optimization Method, Neural Computing, Computer Security, Data Analytics and Database Systems.

China Minsheng Banking Corp. LTD. (Financial Technology Product Manager, full-time) **2022.7-2023.9**

- Led products of digital banking: "public maintenance funds", "payroll", "fund custody" and "supply chain repayment", analyzed requirement documents, drew system interaction diagram.
- Expanded unified electronic payment channels, and connect with the order system to design standardized Internet payment webpage.
- Led to build agent payment component including agent payment document component, transaction anti-duplicate component, company-to-person maximum amount component, intelligent transfer route component, bill statement component and cash management product operation monitoring in the product standardization construction, and draw the corresponding flow chart and prototype demo.

Deloitte Consulting (Shanghai) CO., LTD. (Digital customer business analysis, internship) **2021.08-2021.09**

- Joined the project of digital customer consulting Project. Discussed requirements of two function parts of customer's system with employees. Analyzed requirements of these two parts. Wrote the detailed requirement documentation.
- Communicated with developers to elaborate on requirements and propose initial approaches and timeline.
- Followed up the progress of development of these two parts and answered any questions from developers about details
- Tested functionalities according to the pre-defined testing case, and reported any error to the developers.

Inner Mongolia Rural Credit Union Bank (IT risk management assistant, internship) **2019.06-2019.08**

- Participated in data analysis of large amounts of IT risk. Assisted in the establishment of algorithms and risk models to provide theoretical basis and suggestions for the optimization of the company's internal IT risk management strategy. The theoretical and practical models have been widely recognized in the IT risk management team
- Assisted the analysis of IT risk control, designed risk prevention information technology platforms, and design concepts were used in the research
- Wrote the research report entitled '*Explorations and Research On IT Risk Prevention Technology for Small and Medium-sized Banks*'. Won the second prize of the key research project achievements of the province's rural credit cooperatives in 2019

Awards

- 2024 CFA China Future Financial Analyst Competition issued by CFA Institute
- 'Merit Student' of Xi'an Jiaotong-Liverpool University 2017-2018 academic year

Extracurricular Experience

The University of Liverpool (Peer Mentor) **2019.09-2020.05**

Xi'an Jiaotong-Liverpool University (iOS Club Member) **2017.10-2018.02**

Dare to Dream (AIESEC Volunteer English Teacher) **2017.06-2017.07**

Additional information

- **Computer skills:** Python, R, MATLAB, SQL, Java, C++, PHP, Perl, JavaScript
- **Language skills:** Native speaker of Chinese mandarin, Fluent in English
